**Subject:** RE: azoxystrobin shipment

Brian,

I am sorry but I beg to differ.

If we go back all the way :-

- 1) Formulation development work should be done while the tech submission is made, not sure why you do not have a qualified formulation till date
- 2) You are well aware from long time what your tolling slot is for this product, why are you asking to ship the product at 11<sup>th</sup> hour on nov 11<sup>th</sup>, why haven't this been planned at your

Outside Counsel Only

WW008930

end earlier.

- 3) You know that special bags are required for this, why were these not arranged earlier ? In fact SSJ had to remind you about these bags as till such time no one at your end had noticed this.
- 4) You have confirmed on Nov 11<sup>th</sup> to ship the product, the factory needs some time to pack it and send it to the port, Fei has booked the vessel on nov 21<sup>st</sup>, what else can anyone else do to make it faster.
- 5) We shipped Propiconazole in record time on 3<sup>rd</sup> nov as soon as your confirmed it to make sure you get it by mid nov.
- 6) Fei only asked if she should ship whole quantity together on 25<sup>th</sup> instead of in 2 fcl on 21<sup>st</sup> and 25<sup>th</sup>, the 2<sup>nd</sup> fcl could not have been shipped before as the bags only arrived just now.

I would rather like to ask you and Niki why this was not planned in time before leading to a situation where we might end up missing the season ?

If at all Agraform does not formulate this for us, I do not believe that there is no other formulator in all of USA that can not formulate this product when the main season starts from March. The only reason why we are importing early is because Agraform chooses to provide a production slot 3 months earlier than what we need.

I would much appreciate if you can send us the production schedule that we have been talking about for weeks now which needs to be updated at your end.

Regards

Vijay

**Subject:** FW: azoxystrobin shipment

Vijay, Sathish and Kitty.

Someone really needs to be following thru on our shipments.

Below please find the email string where Fei & SSJ asks if we want 12MT of Azoxystrobin shipped on November 10th and I say yes, ship it immediately.

Now Fei says she will ship the entire quantity of 22.5MT on November 25th.

With this we will miss our tolling slot and not be able to sell the goods and deliver the revenue back to the HK office by the end of the year as expected by Vijay.

Please explain the delay.

Thanks,

**Brian Heinze**

I found out today that the bags are NOT available out of China and I am working to get them airfreighted from the USA to China. I am also trying to get the package performance information that was requested but am not having a lot of luck. I'll keep trying and will keep you all posted. I understand the urgency and will stay on it.

Fei,

If you can get the goods off loaded in St. Louis, Denise can set up trucks to deliver the goods to Agraform.

I think the trucking expense should be between \$3-500 per truck.

With that in mind, we will still save around \$2,200 in doing so.

Please keep us posted as you know more.

Thanks,

**Subject:** Re: Re: azoxystrobin shipment

Dear Brian and Niki,

For Azoxystrobin tech, 2x20'GP to MO 63111, the freight is \$4200.00x2=\$8400.00

1x40'GP to ST LOUIS, MO RAMP, the freight is \$5250.00/40'GP, but the truck cost and devanning cost is pending, they need to find a warehouse first.

Can you estimate the whole the cost ? Then we can decide how to ship it.

**Best Regards**

Dear Brian,

I understand, we can let agent to arrange this for you! Our purpose is saving the cost and ship it fast and safely.

Can you advice the final address to me? then I can give check the cost with agent, we can compare the cost and the transit time.

**Best Regards**

Fei,

These shipments need to be made door to door.

We have always done this and I am also

confused why you would ask us to move the goods once they arrive to the US.

Please make sure the goods are rated door to door.

We don't have the staffing to handle the inland portion of the shipments, plus it adds significant cost to the freight.

Thanks,
